ITEM-336: (R-84-371) ADOPTED AS RESOLUTION R-259458

Considering the protests and determining that the public interest and convenience would be served through the acquisition of nine acres in Switzer Canyon by the San Diego Open Space Park Facilities District No. 1 for open space purposes, under Resolution of Intention R-259271, adopted September 19, 1983; authorizing the City Manager to accept a deed or deeds conveying said properties to the District; authorizing the expenditure of an amount not to exceed \$1,250,000 from Open Space Fund No. 79102 as payment for said property.

(Park Northeast Community Area. District-8.)

CITY MANAGER REPORT:

Switzer Canyon is within the Mid-City Canyons' Open Space System, the tenth priority on the Open Space Retention List adopted by the City Council on January 8, 1979. There are currently 10 acres of Switzer Canyon in City ownership. Manager's Reports CMR-82-188, May 12, 1983, and CMR- 82-451, October 29, 1983, recommended and the City Council approved 10 additional acres for purchase as part of the reprogramming of approximately \$7.7 million in funds then remaining from the second bond issuance. This request is for \$1,250,000 of the funds approved by the City Council to purchase 36 parcels in 15 different ownerships at fair market value plus 30 percent to cover miscellaneous costs such as title, escrow, time projections, possible litigation costs, etc.

Another three parcels in three ownerships were appraised but are not recommended for acquisition. Two of these parcels are adjacent to and front on an improved street, with existing houses on one side and an unimproved street on the other. The third parcel, next to an existing house, has direct access to an improved street. Although the owner of this property has indicated that he prefers to develop the parcel rather than having the City purchase it, the adjacent property owner is anxious that it be preserved as open space and has

indicated a willingness to contribute toward its purchase. The fact that these parcels are immediately developable makes them extremely expensive for retention as open space. Their purchase would require an additional \$320,000, which would include the fair market value and miscellaneous costs as listed above. Their removal from this acquisition plan will not severely impact the system.
